SUPPLEMENTARY INFORMATION:

A. Purpose

Government contracting officers may include FAR clause 52.222-32, Construction Rate Requirements-Price Adjustment (Actual Method) in fixed-price solicitations and contracts, subject to the Construction Wage Rate Requirements statute under certain conditions. The conditions are that the solicitation or contract contains option provisions to extend the term of the contract and the contracting officer determines that the most appropriate method to adjust the contract price at option exercise is to use a computation method based on the actual increase or decrease from a new or revised Department of Labor Construction Wage Rate Requirements statute wage determination.

The clause requires that a contractor submit at the exercise of each option to extend the term of the contract, a statement of the amount claimed for incorporation of the most current wage determination by the Department of Labor, and any relevant supporting data, including payroll

records, that the contracting officer may reasonably require. The information is used by Government contracting officers to establish the contract price adjustment for the construction requirements of a contract, generally if the contract requirements are predominantly services subject to the Service Contract Labor Standards.
